

**Description:** A mild descaler with a pleasant scent. It solubilizes and removes magnesium and calcium salts without necessarily using hot water. It contains a metal inactivator which makes it suitable for use on refined metals and marbles without danger of corrosion. Also suitable for dissolving sea water salts

**Suitable for:** Taps, showers, tiles, refined bathroom accessories, sinks, steamers, utensils, boilers, coffee makers, CIP and pumps

**Application instructions:** Spray directly onto the desired surface and leave on for 5 minutes before rinsing off with water. To descale utensils dilute at a 50% ratio and leave on for 5 to 30 minutes depending on the accumulation of salts. The diluted product can be reused for up to 10-12 times. To descale refined metals spray the product directly onto the surface, immediately wipe with a clean cloth and rinse off with a second damp cloth

**Precautions:** Do not store in places with high humidity. Do not mix with other acids or chlorine products. Not to be used by people with anaphylaxis on citrus

**pH:**  $2 \pm 0.5$

**Ingredients:** Contains <5% anionic surfactants, zeolite and citric acid
