

Description: Powerful detergent against carbohydrates and polymerized stains of oleaginous origin (animal, vegetable or inorganic fat)

Suitable for: Heavy industrial use (equipment and machinery), fireplaces, grills, ovens, stoves and other surfaces with burnt oil residue

Application instructions: The product should not be diluted when used on demanding tasks. Spray directly onto the surface with a foam spray head (HDPE container) at 50°C. Leave on and wait for 10' until the foam turns brown. Remove residue with compressed water or with a metal brush and spatula, wearing gloves and protecting glasses. Always rinse with water

Precautions: Do not use on low quality stainless steel, aluminium and varnished wood. Do not pour or store in PET bottles

pH: 13.5 ± 0.5

Ingredients: Contains zeolite, <5% anionic, nonionic surfactants and phosphonates
