

**Product description:** An efficient drying and brightening liquid for use in professional dishwashers. Ideal for glass, porcelain and stainless utensils. It contains metal inactivators and therefore it is not corrosive

**Application areas:** Professional dishwashers

**How to apply:** Use in a ratio of 1ml to 2ml of product per litre of water in the washing machine drum (approximately 60ml at the start of the first wash for washing machines that do not have a dosing pump). It is recommended to use ZeoGlow with the automatic specially adjusted dosing pump provided by ZeoTec. The product is fully drying when the rinsing pressure is greater than 5 bar and the boiler temperature is in the range of 90-95 °C

**Exceptions:** None, as long as the washing machine is operational

**Dosage per water hardness:** The product dosage for professional dishwashers is calculated and adjusted by ZeoTec accredited technicians after sampling water at the on-site dosing pumps

**pH:**  $2 \pm 0,5$

**Oxidizing properties:** None

**Ingredients:** At least 5% but less than 15% non ionic surfactants and less than 5% anionic surfactants
