

Description: Special liquid detergent with a pleasant ocean scent ideal for use on floors, wooden surfaces, marble and lacquered surfaces and tiles. It can be diluted and can be effective on a wide surface / dirt combination. Its application creates an electrostatic coating film which protects the surface from dust and at the same time it fills up the voids on the surface with zeolite particles

Application Areas: Suitable for all interior floor types such as marble, wood, epoxy, industrial and granite. Ideal for all lacquered surfaces. It can be used on most kitchen and bathroom surfaces, walls, doors, tiles, furniture and light fixtures

Applications: Use diluted in a water bucket for floor mopping or in a spray bottle for other surfaces. Wipe off with a mop or cloth as required. To clean furniture dilute with water on a 25% ratio, spray and wipe with a microfiber cloth. Mop floors with a 1% ratio for routine mopping. When a more evident scent is required increase ratio to 3%

Exceptions: None

pH: 7 ± 0.5

Ingredients: Contains less than 5% anionic, nonionic surfactants, methylchloroisothiazolinone and methylisothiazolinone preservative, fragrance and zeolite
