

Description: A powerful natural soap against oily / greasy stains. It can be used either as a booster, together with GA329 and F0729 or as a standalone detergent. When used together with GA329 it produces a bright and clean result on garments regardless of their color or material, together with a very low fail rate. Its composition does not harm the metallic or plastic parts inside the washing machine and helps keeping drains and pipes unclogged

Application areas: Hotels and industrial washing machines

Application instructions: Use 4-8ml / kg of clothing. It is effective even at washing temperatures above 30°C. It can be used as a main washing detergent or as a washing booster

pH: 4 ± 0.5

Ingredients: Contains at least 5% but less than 15% anionic and non ionic surfactants, less than 5% phosphonic compounds, soaps and zeolite. Contains METHYLCHLOROISOTHIAZOLINONE and METHYLISOTHIAZOLINONE preservative. It can cause allergic reactions
