Zeo fine

Description: Heavy duty detergent for cutlery, crockery and glassware, suitable for use in all professional dishwashers, as well as CIP cleaning equipment.

Application areas: Professional dishwashers, CIP systems

Application method: For dishwashers: Ideal usage ratio ranges from 1gr to 5gr of detergent for 1lt of water during the drum fill-up stage (around 200ml in the beginning of the first washing cycle and then 100ml for up to the 6th subsequent washing cycle). Product is best used when poured in the washing machine through automatic dosing pumps. ZeoFine reaches its maximum effectiveness point when the temperature inside the washing drum ranges in between 60-65°C.

For CIP systems: Ideal dilution ranges from 5% to 10% /lt, depending on the cleaning needs. It reaches its maximum effectiveness when the temperature inside the CIP container is in between 40 and 60°C.

Exemptions: None

Special instructions for hard / soft water: The suitable dosage for each dishwasher will be determined by ZeoTec's specialized technicians after a water sample will be taken and analyzed. For CIP systems, dosage is calculated according to the type, the temperature and the molecularity of the dirt.

PH: 13,5 ± 0,5

Ingredients: Contains at least 15% but less than 30% GLDA and less than 5% polycarboxylate compounds.
